Experience

Full Stack Developer Aug '21 - Nov '21

ShapeAI, Bengaluru, KA

ShapeAI (Now DevTown) is an Internship program / training for full stack development.

I have achieved the following:

- Built Full-Stack React applications, utilizing industry best practices to ensure high-quality code.
- Acquired valuable expertise in using ORMs to interact with databases efficiently and effectively.
- Created, programmed, modified, and debugged application programs, ranging from simple to highly complex ones.

Frontend Developer Jan '21 - Apr '21

IVentors Pvt. Ltd., Chennai, TN

IVentors is a startup aimed to make education accessible for every individual. They have a platform for mentorship and a few others.

Key Qualifications & Responsibilities:

- Successfully migrated the entire code base of the company from HTML to React reusable components, while also implementing several additional functionalities.
- Collaborated with members of the product team to execute the development of new features.
- Provided recommendations for new technology integration that were aligned with the business goals and appropriate for the company's needs.
- Mentored and guided a team of four frontend developers, enabling them to attain professional and personal growth.
- Worked as part of a team on a user-centric design strategy to transform UX and business requirements into coded solutions.

MySQL	npm/yarn
	Figma

Education

JECRC UNIVERSITY

BTech Computer Science

September 2021, Jaipur, RJ

CGAP: 7.7 / 10

Projects

Windows 98 inspired drawing app

Windows 98 was my first introduction to computers.

- The application is built with React for interactivity.
- Redux and RTK are utilized for state management.
- Offers undo and redo capability so users can revert and redo changes.
- Users can export their drawings.
- A range of color options are available for users to choose from.
